

# Fitting Guidelines

## Land Rover Defender 4 Pin LED Flasher Unit Part Number: WFL7LED

**1**  
Locate and remove plastic housing of fuse box.

**2**  
Unscrew metal fuse box casing (2 screws) to expose the rear wiring and standard flasher unit.

**3**  
Unscrew bracket holding the existing flasher unit.

**4**  
Remove bracket from the standard flasher unit.

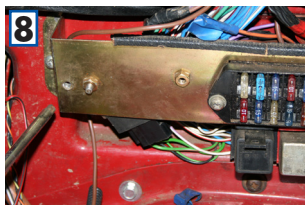

**5**  
Place the bracket around the Wipac LED Flasher Unit.

**6**  
Screw bracket back onto the metal fuse box casing.

**7**  
The flash rate will automatically adjust. The trailer warning light on the dashboard may need to be adjusted using the controller on top of the flasher.

**8**  
Screw the metal casing back into place.

**9**  
Finally, replace the plastic housing.
